P

PK	PIME	BOJA	TEZ
P1	MM	CR	4
P2	KL	ZE	6
P3	VI	PL	5
P4	VI	CR	7
P5	ZA	PL	8
P6	ZE	CR	3

SP

SK	PK	KOL
S1	P1	3
S1	P2	4
S1	P3	2
S1	P4	5
S1	P5	4
S1	P6	3
S2	P1	5
S2	P2	4
S3	P3	1
S3	P5	3
S4	P2	2
S4	P4	4
S4	P5	2
S5	P5	3

Tables

S(SK,SIME,STATUS,GRAD)

P(PK,PIME,BOJA, TEZ)

SP(SK,PK, KOL)

→ In WHERE part of the SQL statements that work with 2 or 3 table, you MUST put these conditions

S.SK=SP.PK (S-SP relation) и

P.PK=SP.PK (P-SP relation)

Exercise (1)

- ❖ Find the product codes for products that are distributed by supplier with code S2

- ❖ Find the names of these products

Exercise (2)

- ❖ Code and status of suppliers that come from London
- ❖ Product codes and City names from where they are distributed

Exercise (3)

- ❖ Supplier codes for those suppliers that distribute product P2
- ❖ Names of these suppliers

Exercise(4)

- ❖ Supplier names for those who distribute at least one RED product.
- ❖ Products that are distributed from suppliers that distribute ALL products.

Exercise (5)

- ❖ Find the number of product distributed per supplier
- ❖ Names of suppliers that distribute ALL products

Exercise(6)

- ❖ Find the distributed quantity of P1 product
- ❖ Find the average weight of products distributed from suppliers S1 and S4
